css - Decode google chrome cache file - Stack Overflow

<https://stackoverflow.com/.../19212087/decode-google-chrome-cache-file>

I was wondering if it's possible to convert chrome **cache** file contents to normal text. I accidentally deleted one important CSS file and I need it back.

Is it possible to decode EPM AddIn cache file names? - ...

answers.sap.com › Community

Alternatively, the **cache** files could be read directly, however with the names encoded it takes too long to find the right file. The Question: Is it possible to **decode** the **cache** file names so our code could know which file it should read without searching through each file in the **cache** folder?

Ask TOM "How to flush the db buffer cache"

https://asktom.oracle.com/pls/asktom/f?p=100:11:0:::P11_QUESTION...

It will not flush the entire thing, but it will impact the utilization (big tables that are scanned are buffered in a way that causes those full **scan** blocks to be aged out much faster than other blocks -- so the full **scan** tends to age out its own blocks first, it will not blow out the entire buffer **cache**)

Ntrtscan.exe process causes high disk I/O in ... - Trend ...

<https://success.trendmicro.com/solution/1060249-ntrtscan-exe...>

Under the Cache Settings for Scan, untick the "Enable the digital signature cache" checkbox. Click Save and wait until the changes are applied.

<https://blogs.msdn.microsoft.com/stephe/2011/11/07/wp7-real-time...>

Nov 07, 2011 · Now that we can **scan** a barcode from a picture thanks to ZXing lib, let's try to improve the user experience. It would be much better to scan a barcode in real

try to improve tne user experience.. it would be much better to **scan** a barcode in real time, just like WP7 does out of the box. I wanted to provide this kind of experience in my own application.

Real-time Scan - Trend Micro

docs.trendmicro.com/.../osceag/osceag-scan/real-time_scan.htm

Each time a file is received, opened, downloaded, copied, or modified, Real-time Scan scans the file for security risks. If OfficeScan detects no security risk, the file remains in its location and users can proceed to access the file.

GCVNRX Anthus Decoder Cache (Multi-cache) in ...

https://www.geocaching.com/geocache/GCVNRX_anthus-decoder-cache

The “Anthus Decoder Cache” is a 3 stage multi-cache. All 3 stages are in green metal ammo cans. If you have found or otherwise acquired an “Anthus Decoder Geocoin” it will allow you to bypass the second stage and proceed directly from the first stage to the final stage. The cache is located in a state park.
